

JOB TITLE: AI Engineer

JOB OVERVIEW

We are looking for a skilled AI Engineer to join our team. The ideal candidate will have experience in building and deploying AI and ML applications to solve real-world problems.

RESPONSIBILITIES

- Design, develop, and deploy AI/ML models.
- Build APIs and web services for AI models.
- Collaborate with team members to integrate AI solutions.
- Perform data preprocessing and feature engineering.

REQUIRED SKILLS

- Proficiency in Python, TensorFlow, and FastAPI.
- Experience in machine learning and deep learning.
- Familiarity with NLP and computer vision projects.

PREFERRED QUALIFICATIONS

- Experience with Docker and Kubernetes.
- Experience deploying AI solutions to cloud platforms.
- Strong problem-solving and communication skills.
